## Connecting with the framework: how small changes in teaching practices can have big impacts on student learning.

The new framework has been officially adopted and we all have questions. What has changed? How will this impact instruction? Assessment? Curriculum? Me? My students? Join us as we explore changes to the framework and what it means for our classrooms, schools, and districts.

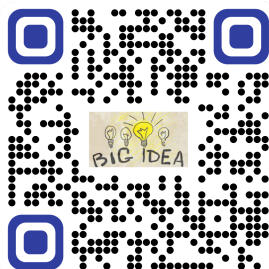

Our Saturday Series this year will focus on what we can expect from the new framework. We will “kick-off” the series with a FREE evening featuring Executive Director Kyndall Brown. Kyndall, author of “Choosing To See”, will provide us with information around equity in the mathematics classroom and how this important lens is an integral part woven through the framework at all grade levels.

September 14, 2023 event is absolutely FREE | [PRE-REGISTRATION IS REQUIRED!](#)

The four full-day Saturday Series Events will provide hands-on, informative sessions, discussion and activities around the “Big Ideas” expressed in the framework:

- “Why”- Drivers of Investigation
- “How”- Standards for Mathematical Practice
- “What”- Content Connections

Using Universal Design for Learning (UDL), we will investigate how to support learning for all and examine how to broaden assessment practice. Each Saturday workshop will include opportunities to work collaboratively with teachers across and within grade bands. Leading researchers in the field of math and math education will be keynote speakers at each session! Stay tuned for specifics about keynote speakers coming to each event!

#### THE FOUR WORKSHOP SERIES DATES ARE:

Saturday, October 28, 2023 | 8:30A - 3:00P  
Saturday, January 20, 2024 | 8:30A - 3:00P  
Saturday, March 9, 2024 | 8:30A - 3:00P  
Saturday, May 4, 2024 | 8:30A - 3:00P

#### THE COST OF THE FOUR WORKSHOP SERIES:

\$500/person | \$150/event
